

CLIENT INFORMATION

Answering your question:

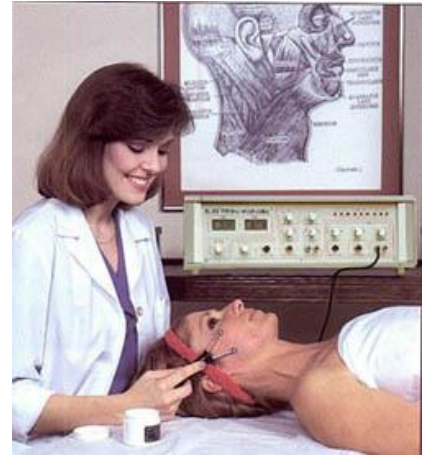

“Please tell me more about the Microcurrent Myopulse for Facial Rejuvenation.”

Who will do this for me?

Suzanne Boehm, a Licensed Esthetician who has over 35 years of experience in beauty spas and in the homes of exclusive private clients around the world.

What is it?

The Myopulse is the Rolls Royce of non-invasive face-lift biotechnology. It is the most advanced and sophisticated Microcurrent System available today. It “reads” the tissue using biofeedback sensors and according to the “needs” of your individual tissue, it delivers tiny currents of electricity which you cannot feel. The whole experience is relaxing, refreshing and totally comfortable.

As various smooth metal probes are applied to the surface of your neck and face, microamperage currents gently stimulate the 3 layers of tissue cells:

- Surface skin cells (epidermis – the top layer that can be seen)
- Underlying skin cells (dermis – the layer where collagen and elastin are produced)
- Muscle cells (sub-cutaneous – tissue which forms the contours of facial features).
These are the delicate muscle cells that become weak and depleted over time, causing unsightly sagging and drooping.

As the microcurrent stimulation activates the cells of the skin, it flushes out and removes the build-up of dead cells and debris, especially around wrinkles. It reaches underneath to tone and firm underlying muscles by rejuvenating sluggish and dormant cellular activity. It reawakens cells of all types, bringing them back to youthful vitality. A smoothing result is obvious up close and at a distance. “Lifted” facial features and that “dewey” look of youthful skin reappear.

The Two-Hour Session consists of the following procedures:

- 1) Cleansing & Exfoliation (Fingertip Massaging)
- 2) Microcurrent Neck & Face Lift
- 3) Microcurrent Detail Work (such as lines, wrinkles, dark spots, eye bags, droopy lids, Rosacea, acne, scars, etc.)
- 4) Refreshing Mask appropriate for your skin type
- 5) Microcurrent Alphawave Relaxation (during Mask)
- 6) Application of natural, nourishing skin products following treatment including Toner, Creams, and Replenishing Oils

When can I do it?

Begin anytime. Most people require a series of sessions to achieve the full benefit and lasting results. Especially if you are already seeing the signs of aging, the sooner you begin, the less deterioration will occur. Call to schedule your First Introductory Session.*

Where can I have this done?

Suzanne is located in Carlsbad, California.

Why Would I want to do this?

Two full hours of facial pampering ... feels amazing. You'll look incredible. People will say *"You look great, you look so young. So what are you doing?"*

We appreciate your referrals and offer you a Free Facial Rejuvenation Session for any referral of yours who signs up for a Complete Deluxe Series of Eleven.

How Much Does it Cost?

First Introductory Session is \$300.

**Call, text or email to schedule your first session.
Experience the feeling for yourself and
see the change in the mirror!*
